PROFESSIONAL SUMMARY

Computer Systems Engineering graduate with hands-on experience in IT infrastructure, network administration, and enterprise systems, gained at Karachi Shipyard & Engineering Works and Fauji Fertilizer Company Limited. Proficient in LAN/WAN configuration, IP addressing and subnetting, server and Oracle database monitoring, and IFS ERP supply chain operations, backed by a software development foundation in Vue.js, Python, and C++. Known for fast learning, structured troubleshooting, and keeping systems reliable. Seeking an IT, networking, or systems engineering role where I can contribute to dependable infrastructure and grow in cybersecurity and enterprise technologies.

WORK EXPERIENCE

PEC – Graduate Engineer Trainee (GET) Placement Program **Apr 2026 – Aug 2026**

IT & ERP Support Engineer – Karachi Shipyard & Engineering Works Limited (KS&EW), Karachi

- Selected for the PEC Graduate Engineer Trainee (GET) Placement Program and placed at KS&EW as an IT & ERP Support Engineer.
- Managed and supported IFS ERP operations, focusing on the supply chain module, inventory tracking, and enterprise business processes.
- Created and managed Fault Reports in IFS to record, track, and monitor technical and operational issues through to resolution.
- Supported network administration, monitoring, and troubleshooting to keep the shipyard's IT infrastructure running reliably.
- Assisted with configuration, maintenance, and troubleshooting of network devices and systems across departments.
- Worked with IP addressing and network connectivity, diagnosing connection problems and restoring service quickly.
- Provided day-to-day technical support and system maintenance, coordinating with users and technical teams to resolve issues.

IT Intern **Jan 2026 – Feb 2026**

Fauji Fertilizer Company Limited (FFC)

- Supported IT infrastructure and data center operations to maintain high availability and system performance.
- Configured and maintained LAN/WAN environments, including IP addressing and network connectivity.
- Diagnosed and resolved network issues and performed routine system maintenance.
- Monitored enterprise servers and Oracle database environments and carried out regular data backups.
- Provided technical support for hardware, software, and peripheral systems across the organization.

Software Development Intern **Jan 2025 – Feb 2025**

Ability Pvt Ltd, Software Development Department

- Collaborated with team members on software tasks, applying problem-solving skills and technical aptitude.
- Contributed to team projects and met performance expectations in a corporate environment.

Frontend Development Intern **Jan 2024 – Feb 2024**

Sybrid Pvt. Ltd, SDS Department

- Built interactive user interfaces with Vue.js, applying modern frontend framework practices.
- Assisted with responsive web application features and refined interface layouts and user experience.
- Followed standard industry workflows and debugging processes to identify, isolate, and resolve code issues.

EDUCATION

Bachelor of Computer Systems Engineering **2021 – 2025**

Balochistan University of Engineering and Technology (BUET)

FSc Pre-Engineering **2018 – 2020**

Govt Boys Degree College Usta Muhammad

SKILLS

Networking: LAN/WAN administration, IP addressing and subnetting, routing and switching basics, TCP/IP, network troubleshooting.

Enterprise & Systems: IFS ERP (supply chain), Oracle database monitoring, server monitoring, data backup, hardware and software support.

Programming & Web: Python, C++, HTML, CSS, JavaScript, Vue.js.

Professional: Problem-solving, teamwork, quick learning, technical support, fault reporting.
